Hi Jane,

Just following up on this item. Who should I contact in 6WQ to ensure we have a unified response for #2 and #16?

Thanks,

Stephen L. Tzhone

I believe that all of you are working with Gary G on the NRRB responses
Please let Gary G know which responses you are working on and the status of those responses
They need to be completed as soon as possible. This is a priority. Thanks for your help. CAS

Hi Jane,

Carlos is in the process of responding to the National Remedy Review Board and he had asked me to assist (see below and attached)

Can you assign one or two folks to help me address two specific items (item 2 and item 16)

I'll be starting on it after the July 4 holiday, thanks

Thanks,

Stephen L. Tzhone

Subject: RE: NRRB for San Jacinto Site

I can work with 6WQ on these two

2 RAO - clarify RAOs for source control action not risk from fish consumption Decision documents to clarify this action is part of a watershed problem Addressing direct contact risk .

16 Institutional controls - The information provided to the Board indicates that the preferred alternatives would rely on ICs (including Coast Guard notices and a state law based restrictive covenant) to help ensure protectiveness The Board recommends that the Region explain in its decision documents how the ICs would be monitored and enforced in order to maintain their effectiveness

Stephen,

We need your help in responding to the recommendations/comments from the NRRB review. Please look at these recommendations and let me know which ones you can help with The risk assessor will handle the risk questions. If you have questions, ask me, not Gary. Gray is trying to complete the FS and the Proposed Plan Thanks for your help. CAS
